*See second page for description.

USI INTERNET USER ACCOUNT REQUEST

Internet Users

- Will likely meet the needs of program directors and most coordinators.
- Users will gain the access they need to the system by simply having an internet login which will allow them to login to our registration system page from anywhere they have web access and pull down a series of real-time reports based on programs they are affiliated with.
- The program information that these individuals will have access to includes real-time rosters with contact information, counts on events (programs) and functions (sub-sessions) and financials on revenue anticipated based on current enrollment (including paid registrations and balance dues).
- On each event (program), one director and up to 4 additional coordinators can be listed. Those indicated on the event will then have access to the event information.
- The internet users will use their standard work e-mail address and a password to access these reports.
- Internet users are unlimited and departments can have as many as they would like. Keep in mind they must be listed as a director or coordinator (up to 5 total/event) on an event to be able to see reporting on the event(s).

You will receive an e-mail from a System Administrator once your internet login processing is complete.

Additional information will be provided for user materials and training available as well as a link for report only access.

Name:	Print or type the name of the user
Contact Information:	Complete the contact information
Access to Event(s)/Dept:	List individual events -or- complete department access
Department Authorization:	Immediate Supervisor/Director Signature
